How did the competitive and hostile dynamic between Brahminism and Buddhism over funding, followers, and ideology mark the decline of Buddhism? (Answer in 250 words) 15

उम्मीदवारों को इस कक्ष में नहीं लिखना चाहिए
Candidates must not write on this margin

Buddhism has originated in India by Lord Buddha against orthodoxie and ritualistic discrimination by Brahmins. Thus, since starting, both were at logger's head.

Competition over followers

① Buddhism attracted followers by promoting equality irrespective of caste, gender. However, at later stages, Mahayana absorbed elements of Brahminism and became ritualistic

② Brahminism attracted followers on base of ritual and ceremony. Facing competition from Buddhism, they brought revolutionary changes and got followers²⁶

② Buddhist monks who were once ascetic, became members of royal circles and ~~lost~~ mass followers, while Brahmins did vice versa.

Competition over funding

- By getting royal patronage
- Buddhism got royal patronage from Ashoka and later Kanishka - sidhana, thus narrow patronage
- Brahmins got patronage of Gupta dynasty and also Kanishka varadhan. Few Patronages were anti-Buddhist \rightarrow Shashanka cut Bodhi-gaya tree and persecuted Buddhists.

Ideological competition

Buddhism was based on right conduct and knowledge through

following Ashtangika Marg and middle path. In starting it attracted people due to lack of sūtralu, pali language, strict denial of caste and women inclusion. However with time, they chose Sanskrit language and shifted to even tantric cult (Vajrayana) thus lost ideology for which they started.

However, Brahminism shifted its ideology from sūtralu to dogmatic one. Bhakti Movement further reformed Brahmanism and reformed Hinduism.

Although, there was decline of Buddhism, but with Ambedkar's Neo-Buddhism, it gained further acceptance in Indian society.

Why was it more difficult to rehabilitate refugees in West Bengal as compared to Punjab after partition? (Answer in 250 words)

15

उम्मीदवारों को इस हार्शिए में नहीं लिखना चाहिए
Candidates must not write on this margin

Post Independence, partition of India and emergence of two nations: India and Pakistan led to most difficult task i.e. rehabilitation of Refugee.

More difficult in West Bengal

Reasons

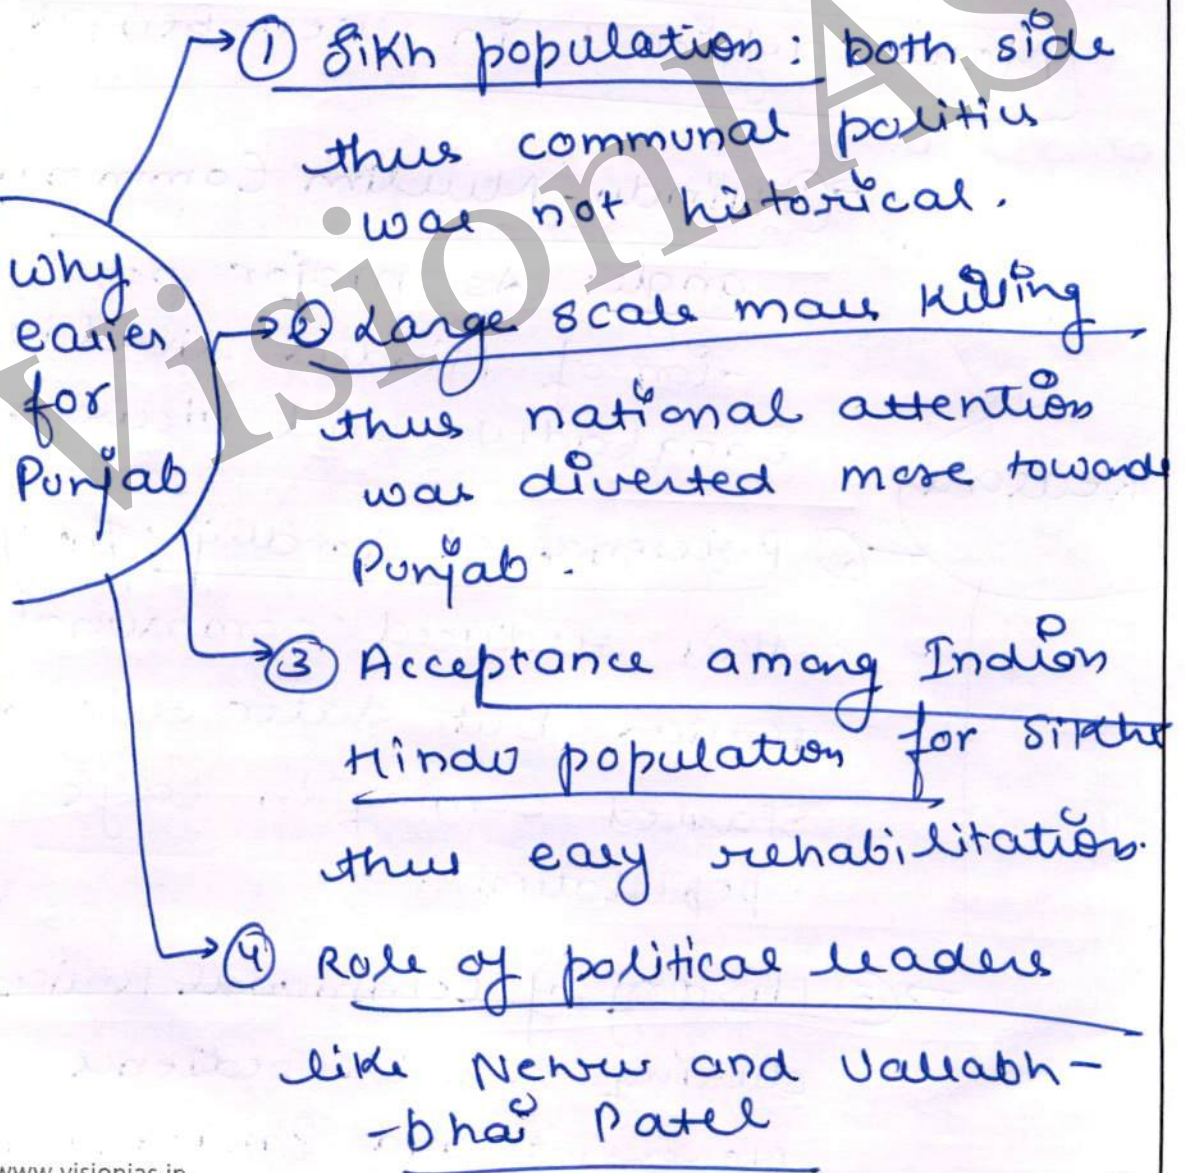

① Hindu-Muslim Communal angle: As major population of Hindus lived in Bangladesh and vice versa.

② Presence of Gandhiji: Though this reduced communal tension but later refugees started coming in large populations.

③ History of Communal tensions during Civil Disobedience Movement, and Pakistan Day.

④ Bengal as centre of Communal politics \Rightarrow Muslim League was formed in 1906 in Bengal only.

⑤ focus of leaders: more in Punjab as atrocity was manifold thus they were settled first.

Due to difficulties in rehabilitation of refugees in W. Bengal, the repercussions are still there -

① Ethnic conflict in Bengal and
N-East \rightarrow Assam movement.

② Demographic imbalance: due to
upcoming refugees.

③ Bangladesh war of liberation,
1972: more refugees to India.

Recent episode of minority persecution in Bangladesh due to protest for reservation would further complicate the refugee crisis in India.

Discuss the economic and social costs associated with the transition from coal to green energy in India. (Answer in 250 words)

15

PM. during COP-28 has reiterated Panchamrut goals which call for net zero emission by 2070 and 50% of energy from renewable source by 2030.

Economic Cost for coal to green energy

① As per WEF, India would need \$10 trillions for achieving Net zero emission by 2070.

② Energy Security: As now 80% of oil and gas is imported, thus green energy will reduce CAD but at same time, costly to install green energy.

③ High Cost installation for green energy → OTEC plant require \$7-8 million for installation.

↳ ④ Intermittency issue: As green energy is periodical and seasonal

↳ ⑤ Transmission lost: 40% for green energy

↳ ⑥ Photovoltaic cells: need semi-conductor, for which India is dependent on Korea, China, Taiwan

Social Cost

→ ① Loss of livelihood for locals
eg. Coal mining projects.

→ ② Inequality will accelerate
as green energy is expensive than coal energy.

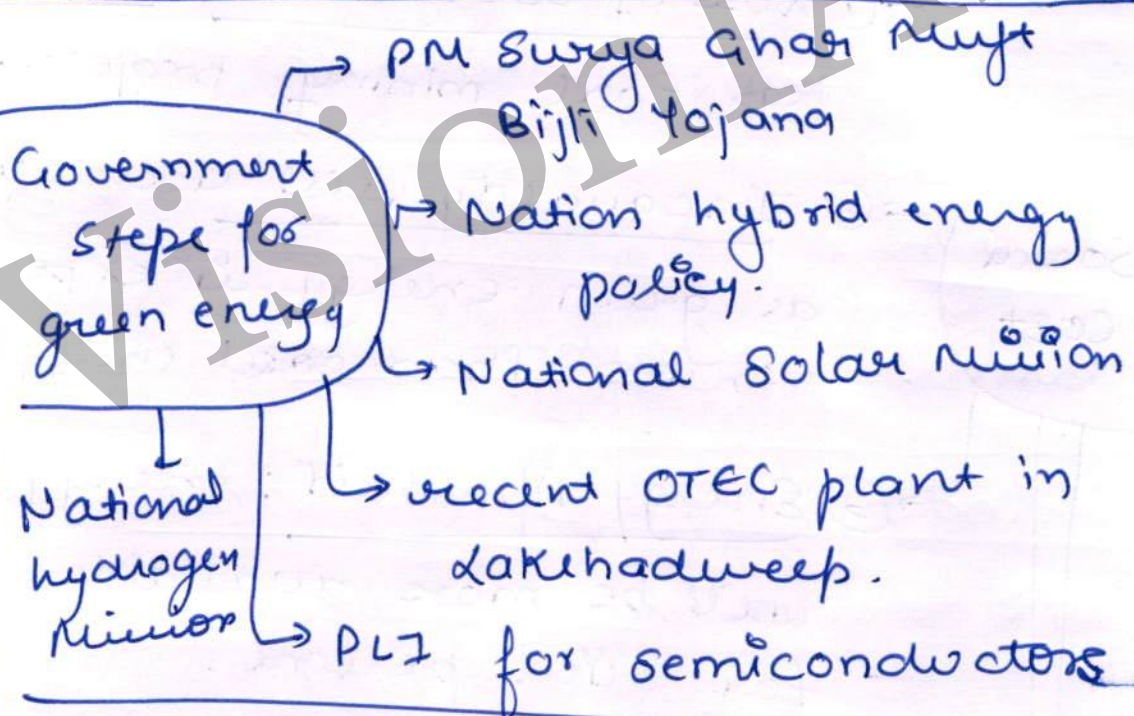

→ ③ Energy Apartheid: energy will be more available for rich people.

→ ④ Women at loss: as they collect firewood from forest.

→ ⑤ Tribal livelihood: MFP would be impacted.

Yet, beneficial to convert to green energy

- ① Health: As per World pollution Report, 9 out of 10 top polluted cities are in India that causes health loss
- ② Safe and secure: as coal energy creates pollution.
- ③ Continuity: as green energy is renewable.

This will help for green energy and achieve goal of free from effect of climate change as said by court in (M. K. Ranjit Singh case)

Volcanic Calderas are extrusive landform created due to pyroclastic impact of volcanic eruptions.

It is formed in composite volcanoes.

Composite volcanoes

eruption with less viscous lava and thus form cone due to lava solidification

When explosion become disruptive, this cone got disrupted and form scoop

rain filled it and form caldera lake

Contribution to the scenic beauty of region

① Pyroclastic clouds: release sulphur and other gases that reduce temperature and provide favourable climate. \rightarrow Mt. Stromboli

② attract rain: due to sudden low pressure created due to eruption of lava.

③ Marvels landforms like dykes, lava tongue are formed.

④ Caldera lake: promote biodiversity and attractive tourist spot.

\rightarrow Mt Vesuvius, Italy.

⑤ Regeneration of soil: by bringing new materials from earth's mantle, this helps in

Growth of vegetation.

⑥ Soil regeneration: As existing vegetation and biodiversity get enjoyed and led to formation of minerals.

⑦ Different rocks: due to igneous rocks from magma and meta-
morphosis, rocks of different types add beauty of the scene.

⑧ Fossil Collection: These areas act as place for fossil collection.

Hence, Caldera not only contribute to scenic beauty but also mineral regeneration and reducing global warming to some extent.

What are the reasons behind the increased frequency and intensity of heat waves globally? How will it impact global food security? (Answer in 250 words) 15

Heat waves, as per IMD, is a phenomenon of rising temperature above 40° for plain area and 30° for hilly area.

Reasons behind increasing frequency and intensity of heat waves

① Global warming

- due to rise in green house gases, global temperature is

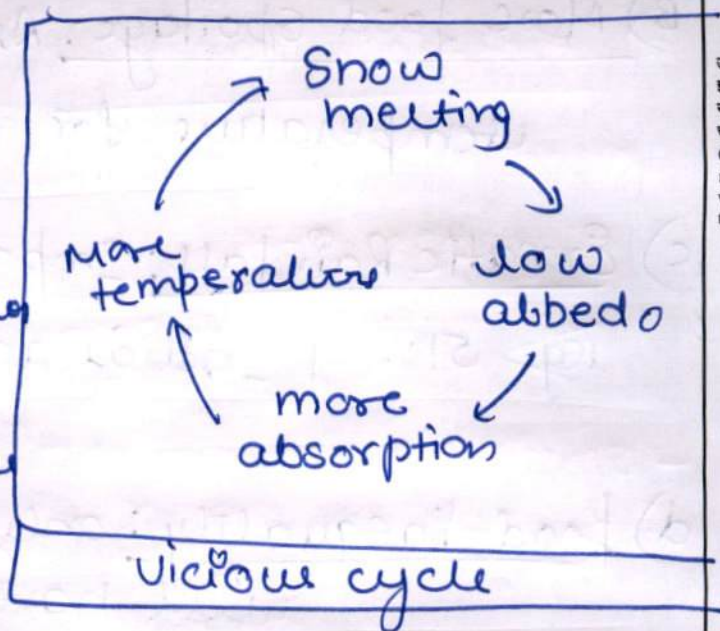

Incidence of heat waves

increasing. As per IUCN, rise of 0.7°C from pre-industrial level.

② vehicular emission - increase pollution and thus increase temperature.

③ Snow Melting

- due to rise of temperature
- Arctic Amplification at arctic is melting two times faster.

④ Deforestation

- reducing oxygen and increasing CO_2
- ↳ reduces rain-attracting capacity
- ↳ due to promotion of mono-culture and urbanisation

⑤ Rapid Urbanisation

- Concentrication
- ↳ Urban heat Islands
- ↳ encroachment of water bodies

Impact on food productivity and security

A) Decrease in food productivity as climate-prone vegetation

↳ wheat productivity will be lost by **33%** by 2050

B) More food spoilage: As favourable temperature for microorganism.

c) Erratic Rainfall: Impact agriculture
eg) 51% of India's agriculture is rain-fed

d) Food inequality: only rich population will have access.

e) Malnourishment and food insecurity due to lack of affordable food.

Government Steps

National level

- drip irrigation, sprinkler
- use of minimum fertiliser
- National Mission for sustainable agriculture
- drought resistant crops like millets

International level

- collaboration to reduce global temperature (COP-26 of UNFCCC)
- supply chain resilience initiative.

Recommendation of N.S. Swaminathan would help in achieving sustainable food security for India

Grassland Biome is one of the five biomes present in India with rainfall of 50-100 cm.

Characteristics of grassland biome

① There are two types

A) Savannah grassland

- found in Sudan
type of climate:

→ have less nutritious grasses and devoid of trees.

→ due to this, animal rearing is difficult.

B) Temperate Grassland

found in colder climate and have nutritious grass.

- suitable for animal rearing.

eg Truck farming in Prairie grassland.

② Rainfall - mostly present at 25-100 cm rainfall while temperate receive more rainfall.

③ Domestication of animals: due to devoid of trees, big-game are generally absent.

→ goat and sheep rearing is prominent.

Threats posed to Banni grassland

Banni grassland is found in Gujarat (Rann of Kachh area).

Threats

- ① Enroachment due to urbanisation, area is reducing.
- ② Reduction in biodiversity
↳ Corals, wild water Ass
- ③ Invasive species threat to native species (Prosopis juliflora)
- ④ Global warming: rising sea level: 3.3 mm/year in North Indian ocean.
- ⑤ Maldivian Tribe focusing on other economic opportunities
- ⑥ Pak-India Issue: Sir Creek
thru border security leads to loss of Bonni grassland.

Way forward

- ↳ MISTHI initiative for mangrove restoration,
- ↳ promote Nature-Man Spirit Complex.
- ↳ bring all stakeholders together.

This will help in achieving SDG-14 (Life ~~above~~ below sea)
